

ALUCOBOND[®]

GIVING SHAPE TO GREAT IDEAS

ALUCOBOND® PLUS

4mm aluminum composite material (ACM) comprised of two sheets of smooth .020" aluminum thermobonded to a solid, fire retardant core. Developed exclusively to meet fire performance requirements while providing the benefits & versatility of ACM.

Fire Retardant Core

.040", .063" or .080" fully recyclable aluminum sheets

AXCENT

A flat aluminum sheet available in .040", offering the perfect complement to ALUCOBOND PLUS for parapet caps, canopies, soffits, metal trim, and more.

ALUCOLUX

.063" and .080" thick flat aluminum sheets. An excellent noncombustible option for metal wall panels and cladding installed over solid substrates or hat channels. It is also ideal for metal trim, soffits and columns that require larger spans and demand durability.

As an industry leader, ALUCOBOND® brand aluminum composite material (ACM) has been a trusted architectural cladding for over 50 years.

ALUCOBOND is manufactured in Benton, KY and is available in:

- ALUCOBOND PLUS 4mm ACM with Fire Retardant (FR) core
- AXCENT .040" flat solid aluminum sheet
- ALUCOLUX .063" and .080" flat solid aluminum sheets

The ALUCOBOND product family offers:

- | | | |
|----------------------------|---|--|
| ■ Flatness and Rigidity | ■ 86 standard ACM colors | ■ All components are 100% recyclable, following separation of core and skins |
| ■ Durability | ■ Custom color capabilities | ■ Zero VOC's emitted in use |
| ■ Light weight | ■ Complementary flat aluminum sheet colors | ■ EPD in compliance with International ISO Standards |
| ■ Formability | ■ Can contribute toward earning LEED points | |
| ■ Ease of fabrication | | |
| ■ Perforation capabilities | | |

The versatile characteristics of ALUCOBOND provide for a plethora of applications such as exterior & interior cladding, column covers, canopies, spandrel panels, soffits, metal trim and more, allowing architects to offer inspiring and innovative designs while meeting the standards of sustainable planning. CUSTOM COLOR

If you require a custom color for your next project, our color technicians will strive to match your desired color. Please note, custom color orders are subject to set-up fees and require a 1,000 sq. ft. minimum per color. Exact matches are not always possible due to different inks & pigments used in various industries & application methods. Matching a color created by a spray method, particularly a metallic, may not match with a color created on a roll coated method.

To ensure that we identify your color correctly, we require **either**:

- A hand sample of at least 1" x 1",
or
- Pantone®, RAL, or paint code reference

Please reach out to your local sales manager to aid with the process at:

alucobondusa.com/sales-rep

Send the color sample along with your

name, company name, address, phone number & email, as well as the project name, project location, type of finish and gloss level to:

Reflect Mirror

*Sample is meant to demonstrate the reflective qualities of the surface but is not an exact match; please request a sample to see the true mirror finish

Chestnut

A close-up photograph of a wood surface with a rich, dark brown color and a prominent, wavy grain pattern. The grain lines are irregular and flow across the frame, creating a textured and organic appearance. The lighting is even, highlighting the natural variations in the wood's texture and color.
