

GATORFOAM®

Extreme rigidity. Lightweight strength. Proven dependability.

GATORFOAM has been the display industry's leading high-performance foam board for more than 30 years. The unique combination of its foam core and wood-fiber veneer facers create an extremely rigid and durable yet light weight solution, perfect for mounting, dimensional letters, and other signage & graphic applications.

FEATURES AND BENEFITS

- The original, completely unique high-performance graphic arts foam board
- Wood-fiber veneers provide extreme rigidity – excellent for mounting applications
- Bright white facer provides very good digital and screen printing results
- Routs and cuts cleanly for easy fabrication
- Excellent dent and scratch resistance
- Lightweight with good dimensional stability
- Available in a range of thicknesses and sheets sizes
- Consistent bright white surface and sheet thickness
- Facers are purchased from suppliers that participate in either the Sustainable Forestry Initiative (SFI) or have a Forest Management Certification

Quick reference sheet for possible applications for GATORFOAM products

	POP Displays	Exhibits & Fixtures	Framing	Interior Signage	Exterior Signage	Dimensional Letters	Store Design	Packaging	Poster Glazing	Mechanical Assembly	Furniture Construction	MDF Replacement	Load-Bearing Platforms
GATORFOAM	●	●	■	●	○ ¹	■	■						●
GATORFOAM SELF-ADHESIVE	●	●	■	●		■							

Trialing is recommended to ensure suitability for the proposed application before full-scale commercialization.

- Short term application
- Medium term application
- Long term application

1 White material in 1" and thicker only; Black GATORFOAM is not recommended for outdoor usage

THE Fabrication Guide

Quick reference sheet for possible fabrication methods for 3A products

	Mounting	Repositioning Vinyl	Digital Printing	Screen Printing	Painting	Knife Cutting	Saw Cutting	Routing	Die Cutting/ Punching	Embossing	Forming	Creasing
GATORFOAM	◇		◇	◇ ²	◇ ³		◇	◇				
GATORFOAM SELF-ADHESIVE	◇	◇					◇	◇				

Trialing is recommended to ensure suitability for the proposed fabrication before full-scale commercialization.

- 2 Face priming will provide better results
- 3 Do not expose polystyrene foam to solvent-based paints
