

New from 3A Composites, introducing the

Complete Paper Board Product Offering

In recognition of the increasing market demand for high-quality, eco-friendly display solutions that don't compromise quality for sustainability, 3A Composites is proud to introduce its portfolio of 100% paper board products. From short term seasonal campaigns to long term structural exhibitions, these three uniquely differentiated product collections strive to meet both quality and sustainability requirements by providing premium solutions for an incredibly wide range of applications.

DISPA® | The Uniquely Sustainable Paper Display Board

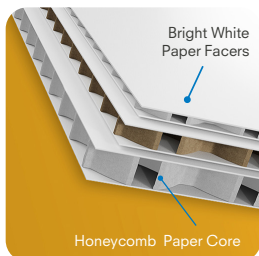

A paper board with smooth, clay-coated facers that offers excellent digital or screen printing results. The unique structure of the core makes this paper board lightweight yet dimensionally stable, and prevents distracting "read-through" lines that occur when alternative corrugated materials are used.

Ideal for short-term interior displays and seasonal sales & promotional campaigns.

POLAR™ | Print Optimized Light And Recyclable Honeycomb Board

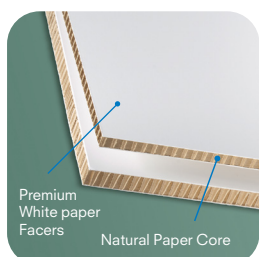

A specially manufactured paper board with a honeycomb core that provides a very rigid, flat panel and features premium bright white coated paper facers that prevent any read-through lines found in competitive corrugated products, delivering superior direct printing results.

Offers a rigid, more durable solution for short - medium term POP displays, event signage, exhibition design & free-standing signage.

SWEDBOARD® FIBRE | Premium Paper Board for Load Bearing & Structural Applications

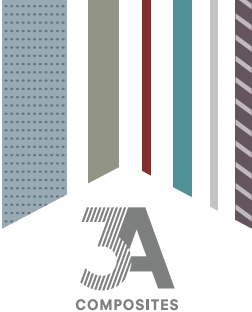

An extremely rigid board that offers a fully recyclable alternative for structural & load-bearing applications. The engineered core is dust-free and provides exceptional strength, stability & low weight, with premium coated paper facers optimized for direct printing & a moisture barrier to keep the panel flat even in dry or humid conditions.

Excellent for medium - long term applications such as booth construction, furniture & load-bearing fixtures, & demanding in-store displays.
