

FOME-COR®

Engineered for Strength

Now enhanced with GATOR-CELL™ Technology, all FOME-COR products utilize an advanced foam cell structure engineered to deliver greater strength, rigidity, & dimensional stability.

This new core technology improves board flatness, provides superior resistance to warping & deformation, & delivers cleaner, more precise cuts for easier finishing. Produced using a proprietary manufacturing process, FOME-COR continues to set the standard for cutting & fabrication performance in both pillowing & non-pillowing/recovery variations.

FOME-COR | *The Original Graphic Arts Foam Board*

- Polystyrene foam with bright white coated or black uncoated paper facers
- Provides excellent results for screen or direct digital printing applications
- Perfect for die cutting with a compressed, pillowing edge that stays closed
- Quick service on cut-to-size orders including large sheets up to 8'x10'
- Uniquely embossable for 3-D effect displays
- Extremely lightweight & cuts easily and cleanly, even by hand

FOME-COR RECOVERY | *Recovery Performance Reimagined*

- Specially formulated **non-pillowing/recovery foam** with bright white coated or black uncoated paper facers
- Edges remain open when die cut for a clean, dimensional appearance
- Bright white, coated paper facers provide excellent printing results
- Surface is more resilient to denting

FOME-COR CANVAS | *Amplify Your Art*

- Polystyrene foam with embossed "canvas-like" coated paper facers on both sides
- Deep embossed texture on both sides creates a more artistic look
- Prints and cuts with the same quality as standard FOME-COR
- Economical alternative to competitive canvas-like products

FOME-COR JETMOUNT | *Demand More From Foam Board*

- Enhanced, densely extruded polystyrene foam with bright white coated or black uncoated paper facers
- The denser foam core provides increased rigidity and warp resistance
- Great for more demanding mounting jobs such as free-standing displays, signage and framing

FOME-COR FOUNDATION | *Your Base For Superior Framing & Mounting*

- Polystyrene foam with a variety of high-quality, **acid-free paper facers**
- Provides a flat, smooth surface for superior mounting & framing with no read-through lines
- Facers ensure a flat and rigid backer material used for framing applications
- Perfect for the archival preservation of valuable art and photographs
- A cost-effective alternative to corrugated cardboard for non-printing applications
- Antique white paper facers meet Library of Congress standards for conservation framing

Engineered for Strength

FOME-COR SINGLESTEP® | *Heat-Activated Mounting Made Easy*

- Extruded polystyrene foam with coated paper facers, one side with **heat-activated adhesive**
- Activated with low temperature settings for a quick and damage-free mount
- Eliminates the need for hot melt tissue stock
- Can be used on a heated mechanical or vacuum dry mount press, or with a heated roller laminator
- Release papers are included in cartons and can be used more than once

FOME-COR SINGLESTEP

FOME-COR QUICKSTIK | *Peel & Place With Precision*

- Polystyrene foam with coated paper facers, one side covered with **pressure sensitive adhesive**
- Eliminates the need for pressure-sensitive adhesive stock
- Release facer peels back to reveal adhesive for easy, more efficient mounting
- Repositionable low-tack (LT) is well suited for hand-mounting methods (Blue release facer)
- Permanent bonding high-tack (HT) is pressure-activated and ideal for high volume, automated mounting methods (Red release facer)

FOME-COR QUICKSTIK

FOME-COR CORK | *Pin Your Ideas, Perfectly*

- Genuine cork facer on one side bonded to high performance polystyrene foam
- 3/8" gauge so push pins won't damage walls
- Specially formulated so edges remain open when die cut
- Can be printed or painted to create customized, designer bulletin boards
- Lightweight and easily cut by hand or machine

NEW! FOME-COR CORK
